

Soil Moisture Depth Profile

To measure soil moisture up to 90 cm
www.project-acorn.net/data-entry

Use before establishing raised planters over native soil at waystations.

Name of School:

Month (mm): Day (dd): Year (yyyy):

Name of Observer:

Local Time: : Universal Time: :

Method of sample: Pit Auger Other

Is soil surface saturated? Yes No

Drying Method: 95 to 105 degree C oven 75 to 95 degree C oven Microwave

Drying Time: :

Sample #	Container ID	A	B	C	(A-B) / (B-C)
		Mass of wet Soil & Container	Mass of Dry Soil & Container	Mass of Container	Soil Water Content
0 - 5 cm	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
7.5 - 12.5 cm	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
27.5 - 32.5 cm	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
57.5 - 62.5 cm	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
87.5 - 92.5 cm	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
